Polar Instruments (Asia Pacific) Pte Ltd

Polar Instruments (Asia Pacific) Pte Ltd has under its umbrella, franchises for some of world's leading product and service providers for PCB design, testing, repair and quality control solutions. We provide market development, marketing, sales and after sales support, for our principals' products in the dynamic Asia Pacific region that covers countries from Australasia / Japan to the Middle East.

Our main principal is Polar Instruments Ltd, UK one of the world's leading designers and manufacturers of PCB design and test solutions for high speeds electronics. Polar products are widely used in the assembled and bare-board printed circuit board industry worldwide and our customers include many "blue chip" MNCs in Asia Pac region.

In line with our dynamic expansion plans in the region, we have immediate vacancies for self-driven and independent individuals for the following position at our Singapore head office.
