

Fully Automated CAF Equipment

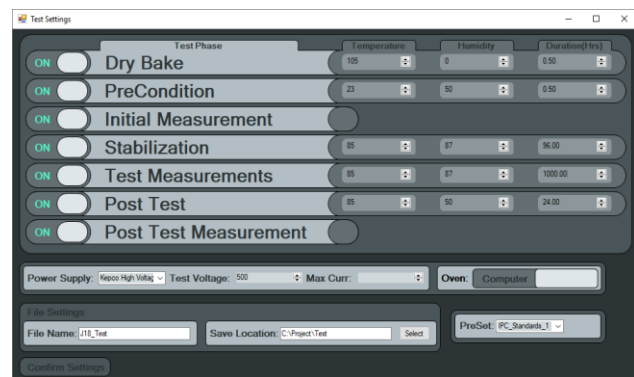

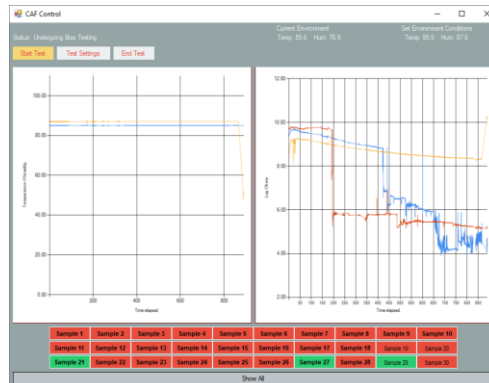

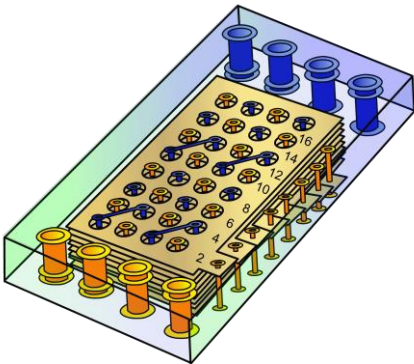

RH control

Temperature control

V Bias control

Custom profiles

Remote reporting

PWB CAF Test Vehicles are unique and follow the IST coupon design methodology of being representative of the board.

- Built with the same construction as board
- Built with the same process as board
- Contains structures found in the board
- Flexible
- Test board or individual coupon

PWB CAF System

- Fully Automated
- Goes up to 1000V
- Measures and monitors 32 samples at a time. Can be stacked thrice to increase the sample size
- Takes continuous measurements to detect a short as soon as it occurs.
